

Test result for task008

T008.1: Verify that pdfbox provides a mechanism for highlighting texts

```
package org.apache.pdfbox.pdmodel.interactive.annotation;  
  
import org.apache.pdfbox.cos.COSDictionary;  
  
public class PDAnnotationTextMarkup extends PDAnnotationMarkup {  
  
    public static final String SUB_TYPE_HIGHLIGHT = "Highlight";  
    public static final String SUB_TYPE_UNDERLINE = "Underline";  
    public static final String SUB_TYPE_SQUIGGLY = "Squiggly";  
    public static final String SUB_TYPE_STRIKEOUT = "StrikeOut";  
  
    private PDAnnotationTextMarkup() {  
        Compiled Code  
    }  
}
```

T008.2: Identify a method for a user to highlight texts

```
public PDAnnotationTextMarkup(String subType) {  
    Compiled Code  
}
```

T008.3: Demonstrate user highlighting texts
